Product Technical Parameters

Input Voltage: 110-264VAC

Working Current: 700mA

Working Temperature:-10℃-50℃

Storage Temperature:-20℃-70℃

User Instructions

①Fix the mounting sling or mounting bracket with the product and put it on top of the fish tank.

②Before connecting, the light switch button should be turned off. When plug in the power cord, all lights will lit up and then go out.

③You can use the remote control to adjust and set the lights according to your needs.

④Please use the original configuration parts and do not change them arbitrarily.

⑤Suggest that the light body especially the emitting surface should be wiped every two weeks with a soft cloth to prevent salt crystals from covering the lens.

Attention:

1. Indoor use only.

2. No water-proof. Avoid any dripping or splashing water to protect light from damage.

3. DO not hit the product when it is working.

4. Please use the product in well-ventilated environment to ensure its better performance.

5. Do not look at the light directly without wearing sunglasses when it is working.
